

Certificate of Training

Aconity3D GmbH certifies that

Mr. Rakesh Nair
has successfully completed the

Additive Manufacturing Training

on the subject of Laser Beam Melting.

Theoretical aspects were developed methodically and finally deepened by practical applications.

Headed by Tobias Klimkait, the training covered the following topics:

AM Software Landscape

- *Hands- On Training for Netfabb 2024*
- *Advanced data preparation techniques*
- *Training on post processor module for Aconity3D machines*

AM Process Parameters and Design for AM

- *Elaboration of parameter Impact focusing lattice structures*
- *Elaboration of Design Rules for Laser Beam Melting of Metals focusing lattice structures*

AM Machine Training

- *Hands- On Training for Aconity3D Machines*
- *Execution of complete process chain to produce lattice samples*

AM Post Processing

- *Hands- On Training to wire EDM cutting of AM produced parts*
- *Overview of Surface Finishing Technologies*
- *Quality Assurance of AM manufactured Parts by means of digital light microscopy*
